

EVANS ENTERPRISES, INC.

Since 1954

**THE LEADER IN ELECTRO-MECHANICAL
SALES, SERVICE AND INTERGRATION**

Our Mission

Our purpose at Evans Enterprises is to serve customers by providing increased value of product and service and enhance opportunities for fulfillment of our employees.

Our highest priority is quality. This includes safety, marketing, product design, application, manufacturing, service and repair. Quality comes before sales, shipments, profits or technology.

However, profit is a requirement of modern business and it is expected that we will continue to improve productivity as we serve customers with increased value and therefore earn a worthwhile return.

Productivity and quality are allied factors that are the functions of inputs ranging from people's attitudes to technical innovation and modern capital equipment. We intend to involve people including vendors, marketing, finance, manufacturing, engineering and customers in a closed loop system to obtain quality and productivity and to find a better way to accomplish results.

We will invest in technology to provide new products and to serve new markets. We will also invest in modern machinery to improve quality and productivity.

Finally, we will provide a safe and superior work environment and challenging careers for every employee. Evans strives to continually develop long term relationships with our customers and strengthen our reputation as a cutting edge company with a great emphasis on quality and character.

Our Company

EVANS ENTERPRISES, INC. has provided first class plant services and products to our customers for over sixty years. Evans services, sells, and supports all types and sizes of electric motors, generators, controls, and related driven equipment. We also provide many value added services including vibration analysis, dynamic balancing, laser alignment, switchgear repair, complete machining capabilities, crane & hoist service, pump repair, fan and gearbox repair and much more. Evans offers a broad range of electric motor, control, variable frequency drive products, parts and accessories that are carefully selected to keep your facility operating with the reliability and efficiency that your company demands. We are now ISO 9001:2008 certified which raises Evans Enterprises to another level of capability and confidence helping to make your job easier.

Evans operates 11 full service plants strategically located in Arkansas, Missouri, Oklahoma, New Mexico, Texas and Washington. Our success is largely attributed to over 300 trained service professionals that strive to exceed our customer's expectations on a daily basis. All of our locations now have KOYO trained and SKF certified technicians offering the latest in bearing handling and installation.

Evans is committed to utilizing the latest equipment, practices, and materials available to provide our customers with the very best in electro-mechanical rotating equipment service. Evans' services are available 24 hours a day, either in one of our 11 plants or at your job site. We understand that equipment fails at all times and we stand ready to respond in the most efficient manner wherever or whenever the need arises.

Since 1954, Evans has listened to the needs of our customers and directed our expansion, diversification, and growth to provide the best and most complete services and products from a single source. We are proud to have customers from all types of industry, government, municipality, and utility entities around the world. We have sold and placed our products on every continent in the world.

Our Services

World Class Rewinds

At Evans Enterprises we do everything we can to assure you that your rewind motors and generators are equal to or better than the original equipment. In many cases, we can actually prove that our rewinds are superior to original factory windings. Evans Enterprises routinely rewinds AC, DC, Synchronous, Slip Ring and many other types of motors and generators. We have successfully rewound and repaired motors up to 26,000 HP and generators up to 18,000 KW and 13,200 volts.

Features & Benefits

- Core Loss Testing
- Temperature Controlled Stripping and Curing Ovens
- Class H or Better Insulation Systems
- Use only Inverter Duty Magnet Wire
- Vacuum Pressure Impregnation at Multiple Locations
- UL Authorized Pump & Motor Repair
- Test Panel - 18,000 HP @ 15KV
- Specialty Coils & Dry Transformers
- Electrical Integrity Testing
- Detailed Digital Repair and Root Cause Reports

Machining and Mechanical Services

Complete In-House Machine Shops

Each plant has a well-equipped machine shop that is dedicated to providing mechanical repairs on the equipment we service. Each plant has the capability to weld, metalize, and machine a shaft, end bell, bearing housing or cut a new keyway to expedite the complete repair process. If a shaft is more economical to replace, we can utilize both horizontal and vertical presses to remove and replace the shaft. Complete new shafts are machined from like alloys. Many other mechanical modifications and repairs are available from Evans Enterprises through our mechanical repair departments.

- Dynamic Balancing – In-House and Field Service
- Sleeve / Babbitt Bearing Repairs
- Standardized on Exxon Polyrex EM Grease
- Pump Rebuilding
- Blower & Fan Refurbishing
- Gearbox, Mechanical and Electrical Variable Speed Drive Repairs
- Component Part Inspection, Measurement & Repair

- Rotating Element Inspection, Measurement and Repair
- AC Rotors
- DC Armatures
- Lamination Refurbishing and Restacking
- Detailed Digital Repair and Root Cause Reports

On-Site Services

For many years equipment to be repaired was picked up at a plant's dock or even delivered to a service center. Today, with dwindling maintenance budgets and staffs, that is sometimes not the case. In response to this change, Evans Enterprises has made most of our services available either in one of our ten plants or at your plant site. Evans Enterprises offers turnkey on-site removal and replacement of most equipment, on-site rewinds and repairs, vibration analysis, dynamic balancing, laser alignment, hoist services, AC and DC drive installation and commissioning and much more. In addition Evans Enterprises owns and operates a complete fleet of pickup and delivery vehicles and can transport loads up to 55,000 lbs. or larger permitted loads.

Switchgear Services

- Hi-Potential Tests
- On Site Bus Repair
- Ground Resistance Tests
- Acceptance / Commission Tests
- Transformer Testing and Repair
- Transformer Oil Tests and Analysis
- Switchgear Testing and Repair
- Protective Relay Testing and Calibration
- Ground Fault Testing and Repair
- Circuit Breaker Testing and Maintenance

Specialty Services

- Remanufactured Equipment Offering Reduced Lead Times and Reduced Cost
- Prototype Development and Small Quantity Manufacturing
- Linear Induction Motor Manufacturing and Repairs
- Generator Prototype Development and Manufacturing
- Down Hole Drill Motors
- 4,000 HP Dyno On-site
- Huge In-House inventory of Explosion Proof Motors through 100 horsepower
- New Motor Inventory through 2000 Horsepower stocked at OUR Locations
- Servo Motor Repair

Wind Turbine Service and Repair

Evans offers very highly trained field service crews maintaining up-tower wind turbines at locations across the United States. Our crews change complete generators, bearings, brushes, lubricants and replace gearbox components. We have created an inventory of specialty OEM motors, by manufacturing locally, to help replace those hard to find motors located in the turbine nacelle. Our national agreements allow Evans to provide critical items at the very best pricing levels to the leaders in the Wind Industry. Generators not producing power are a huge cost for many. We keep the turbines turning.
